

AMENDMENTS TO THE CLAIMS

1-26. (Cancelled)

27. (Previously Presented) An introductions system comprising:

a plurality of mobile communicators; and

a server communicating with said plurality of mobile communicators;

said server being operative to store personal information relating to users of said plurality of mobile communicators and to provide to a first user of said users via said first user's mobile communicator, said personal information relating to a second user of said users, upon designation of said first user by said second user, using said second user's mobile communicator,

said designation comprising employing a mobile communicator location functionality for providing a map indicating the relative locations of a plurality of said mobile communicator in a space, employing the mobile communicator of said second user to receive said map and to designate the location on said map of said first user and determining a mobile communicator address of said first user.

28. (Previously Presented) An introductions system according to claim 27 and wherein said server is operative to provide said personal information generally in real time with respect to said designation.

29. (Previously Presented) An introductions system according to claim 27 and wherein said plurality of mobile communicators comprises at least one cellular telephone.

30. (Previously Presented) An introductions system according to claim 27 and wherein said plurality of mobile communicators comprises at least one wireless personal digital assistant (PDA).

31. (Previously Presented) An introductions system according to claim 27 and wherein said server is operative to determine if said first person is a subscriber to said

introductions system.

32. (Previously Presented) An introductions method comprising:

storing personal information relating to a plurality of users of a corresponding plurality of mobile communicators; and

providing to a first user of said plurality of users, via said first user's mobile communicator, said personal information of a second user of said plurality of users, upon said second user designating said first user by using said second user's mobile communicator,

said designating comprising:

employing a mobile communicator location functionality for providing a map indicating the relative locations of a plurality of said mobile communicator in a space;

employing said second user's mobile communicator to receive said map;

designating the location on said map of said first user; and

determining a mobile communicator address of said first user.

33. (Previously Presented) An introductions method according to claim 32 and wherein said providing said personal information comprises providing said personal information generally in real time with respect to said designating.

34. (Previously Presented) An introductions method according to claim 32 and wherein said plurality of mobile communicators comprises at least one cellular telephone.

35. (Previously Presented) An introductions method according to claim 32 and wherein said plurality of mobile communicators comprises at least one wireless personal digital assistant (PDA).

36. (Previously Presented) An introductions method according to claim 32 and also comprising determining if said first person is a subscriber to an introductions system.
